

Lift-Off Project user stories

User is an Inspector

- Inspector will login in to access the system
- Upon successful login the main Properties page will display with a list of properties – this page will allow the inspector to:
 - View a particular property
 - Add a new property
 - Remove a property
- In addition the inspector may click on a property listing to see what has already been entered.

Inspector wants to VIEW a property that is listed on the properties page

- Inspector will click on property to view
- Inspector will be able to choose either:
 - the inspection
 - the budget estimate
 - the scope of work
- If inspector chooses an option that does not yet have data a page will display letting the inspector know that

Inspector wants to VIEW a property but needs to search for it

- Inspector will click on VIEW button
- A search screen will display asking for one of the following:
 - Property id
 - Property address
- Inspector will enter one of the requested items to start the search
- When the system finds the property the inspector will be able to choose either:
 - VIEW the Property Inspection
 - VIEW the Budget Estimate
 - VIEW the Scope of Work
 - ADD the Budget Estimate
 - ADD the Scope of Work
- If inspector chooses a VIEW option that does not yet have data a page will display letting the inspector know that and asking if they want to add it
